فكرة المشروع مختصرة

A modern technology brand that aims to provide powerful and up-to-date computer components and laptops with reliable warranties and fair pricing, while delivering a complete customer experience that begins with pre-sales support by helping customers choose the most suitable components for their needs, and continues with after-sales service to handle any issues or product returns professionally.

The brand also offers a range of products and services related to the computer industry, including:

1. **Selling original PC Components.**
2. **Selling laptops from different brands.**

3. Providing computer accessories such as keyboards, mice, headsets, and other peripherals.
4. Offering custom PC builds based on the customer's needs and usage.
5. Providing authorized maintenance and repair services for devices and components.

In addition, the brand provides educational content and technical advice that help gamers, students, and freelancers choose the best components and achieve maximum performance without the burden of high prices or limited availability of hardware.

براند تقني حديث يهدف إلى توفير أقوى وأحدث قطع الكمبيوتر واللابتوبات الأصلية بضمان موثوق وبأسعار عادلة، مع تقديم تجربة متكاملة للعملاء تبدأ بخدمة ما قبل البيع عبر مساعدة العملاء في اختيار المكونات المناسبة، وتستمر بخدمة ما بعد البيع لحل أي مشاكل أو عمليات استرجاع باحترافية.

كما يقدم البراند مجموعة من المنتجات والخدمات المرتبطة بعالم الكمبيوتر، وتشمل:

1. بيع قطع الكمبيوتر (PC Components) الأصلية.
2. بيع اللابتوبات من العلامات التجارية المختلفة.

3.توفير إكسسوارات الكمبيوتر مثل الكيبوردات، الماوسات، السماعات وغيرها.

4.تقديم تجميعات كمبيوتر مخصصة (Custom PC Builds) حسب احتياجات المستخدم.

5.توفير خدمات الصيانة المعتمدة للأجهزة والمكونات.

إضافة إلى ذلك، يقدّم البراند محتوى تعليمي ونصائح تقنية تساعد الجيمرز والطلاب وأصحاب الأعمال الحرة على اختيار أفضل القطع وتحقيق أقصى أداء ممكن دون عبء الأسعار المرتفعة أو صعوبة توفر المكونات.

فكرة المشروع موضحة ومفصلة

EPIC TECH is a new technology brand that combines a physical store and an online shop specializing in selling PC Components and laptops, in addition to providing authorized maintenance services.

The project aims to understand the Egyptian market from the customer’s perspective by analyzing real user needs and the problems they face when purchasing computer components or laptops, while identifying market gaps and opportunities to deliver a better purchasing experience. EPIC TECH seeks to build a brand

that is trusted, well-known, and liked by customers by providing real value rather than simply selling products.

The brand focuses on offering competitive and fair pricing for computer components and laptops in the market, while working with authorized suppliers and distributors, ensuring that customers receive original products with genuine warranties and reliable after-sales service.

The project also aims to address one of the biggest problems in the Egyptian computer market, which is the weak or lack of after-sales service in many stores. Therefore, EPIC TECH focuses on delivering a different customer experience based on transparency, trust, and real technical support.

The brand provides a complete range of computer-related products and services, including:

1. **Selling original PC Components.**
2. **Selling laptops from different brands.**
3. **Providing computer accessories such as keyboards, mice, headsets, and other peripherals.**

4. **Offering custom PC builds based on the customer's needs and usage.**
5. **Providing authorized maintenance and repair services for devices and components.**

The brand also provides a direct communication channel through WhatsApp to respond quickly to customer inquiries, including questions related to pricing, technical specifications, recommending the most suitable components, or solving technical problems after purchase. This approach ensures efficient pre-sales and after-sales support while building long-term relationships with customers.

The project targets a wide segment of computer users in the Egyptian market within the age group from 15 to 35 years, including:

- **Gamers who are looking for powerful performance and professional gaming experiences.**
- **Students who need suitable devices for studying, programming, and learning.**
- **Freelancers and PC users who rely on computers for their daily work and productivity.**

The brand personality combines youthfulness, professionalism, and trust, allowing the brand to appear approachable and close to customers while maintaining its position as a reliable and knowledgeable expert in the computer and technology field.

The project plan includes several key steps, such as:

1. **Understanding the Egyptian market and analyzing the computer hardware industry.**
2. **Conducting competitor analysis to identify strengths and weaknesses.**
3. **Building the visual identity of the brand.**
4. **Planning the content strategy for social media platforms.**
5. **Developing a brand awareness and market presence plan.**
6. **Distributing tasks among the 6 team members to ensure balanced teamwork.**

EPIC TECHهو براند تقني جديد يجمع بين محل فعلي ومتجر رقمي متخصص في بيع قطع الكمبيوتر (PC Components) واللابتوبات، بالإضافة إلى تقديم خدمات صيانة معتمدة.

يهدف المشروع إلى فهم السوق المصري من منظور العميل من خلال تحليل احتياجات المستخدمين الحقيقية والمشاكل التي يواجهونها عند شراء قطع الكمبيوتر أو اللابتوبات، مع دراسة ثغرات السوق واستغلالها لتقديم تجربة شراء أفضل. ويسعى EPIC TECHإلى بناء براند موثوق، معروف، ومحبوب من خلال تقديم قيمة حقيقية للعملاء وليس مجرد بيع المنتجات فقط.

يعتمد البراند على تقديم أسعار تنافسية وعادلة لقطع الكمبيوتر واللابتوبات في السوق، مع التعامل مع وكلاء وموردين معتمدين، مما يضمن للعملاء الحصول على منتجات أصلية بضمان حقيقي وخدمة ما بعد البيع موثوقة.

كما يعمل المشروع على معالجة واحدة من أهم المشاكل في سوق الكمبيوتر في مصر، وهي ضعف أو غياب خدمة ما بعد البيع لدى العديد من المتاجر. لذلك يركز EPIC TECHعلى تقديم تجربة شراء مختلفة تعتمد على الشفافية والثقة والدعم الفني الحقيقي للعملاء.

ويقدم البراند مجموعة متكاملة من المنتجات والخدمات المرتبطة بعالم الكمبيوتر، وتشمل:

1.بيع قطع الكمبيوتر (PC Components) الأصلية.

2.بيع اللابتوبات من العلامات التجارية المختلفة.

3.توفير إكسسوارات الكمبيوتر مثل الكيبوردات، الماوسات، السماعات وغيرها.

4.تقديم تجميعات كمبيوتر مخصصة (Custom PC Builds) حسب احتياجات المستخدم.

5.توفير خدمات الصيانة المعتمدة للأجهزة والمكونات.

كما يوفر البراند قناة تواصل مباشرة عبر WhatsApp للرد على استفسارات العملاء بسرعة، سواء كانت استفسارات عن الأسعار أو المواصفات التقنية أو ترشيح أفضل المكونات المناسبة للاستخدام أو حل المشكلات التقنية بعد الشراء، وذلك بهدف تقديم خدمة ما قبل البيع وخدمة ما بعد البيع بكفاءة وسرعة وبناء علاقة طويلة الأمد مع العملاء.

يستهدف المشروع شريحة كبيرة من مستخدمي الكمبيوتر في السوق المصري ضمن الفئة العمرية من 15 إلى 35 سنة، وتشمل هذه الفئات:

- Gamers الذين يبحثون عن أداء قوي وتجربة لعب احترافية.
- Students الذين يحتاجون أجهزة مناسبة للدراسة والبرمجة والتعلم.
- Freelancers و مستخدمي الكمبيوتر الذين يعتمدون على الكمبيوتر في العمل والإنتاج اليومي.

تعتمد شخصية البراند على مزيج من الشبابية والاحترافية والثقة، ليظهر بشكل قريب من العملاء وسهل التواصل معهم، وفي نفس الوقت خبير وموثوق في مجال التكنولوجيا وقطع الكمبيوتر.

وتشمل خطة المشروع عدة خطوات أساسية، منها:

1. فهم السوق المصري وتحليل وضع سوق قطع الكمبيوتر.
2. تحليل المنافسين ودراسة نقاط القوة والضعف لديهم.
3. بناء الهوية البصرية للبراند.
4. التخطيط لاستراتيجية المحتوى على منصات التواصل الاجتماعي.
5. وضع خطة لزيادة الوعي بالبراند والانتشار في السوق.
6. توزيع المهام بين أعضاء الفريق المكون من 6 أفراد لضمان تقسيم العمل بشكل متوازن.

1. Vision & Business Goals

Brand Vision

Epic Tech aims to become one of the most trusted and recognized computer hardware retailers in Egypt by providing reliable PC components, professional technical guidance, and a smooth customer-focused purchasing experience for gamers, students, and professionals.

The company's vision is not limited to selling computer hardware. Epic Tech aims to help customers make better technology decisions by providing transparent product information, expert consultation, and continuous support throughout the entire customer journey.

The brand focuses on building long-term trust by offering genuine computer components supplied through trusted distributors and official agents, ensuring proper warranty coverage and reliable after-sales support.

Long-Term Business Goals

Market Growth and Brand Recognition

Epic Tech aims to gradually establish a strong presence in the Egyptian PC hardware market by building brand awareness through digital platforms such as Facebook, TikTok, and Instagram.

The long-term goal is to become a recognizable and trusted name within the Egyptian gaming and PC

enthusiast community by consistently providing helpful content, authentic products, and professional support.

Customer Trust and Loyalty

Epic Tech focuses on building long-term relationships with customers through three core pillars:

- **Strong pre-sales support through fast responses to customer inquiries and helping customers choose the right PC components for their needs.**
- **Reliable after-sales support that assists customers in cases of product returns, warranty claims, or technical problems.**
- **Helpful and educational content that helps customers understand computer hardware and make informed purchasing decisions.**

By supporting customers both before and after their purchase, Epic Tech aims to build a loyal community of

customers who trust the brand and recommend it to others.

Building a Recognizable Brand Personality

Epic Tech plans to create a recognizable brand personality that acts as the public face of the company.

This personality will appear frequently in social media content and will:

- **Provide PC hardware advice and recommendations**
- **Explain complex technology topics in a simple and engaging way**
- **Interact with the audience in a friendly and entertaining style**

Having a relatable and knowledgeable personality will help simplify technical information and strengthen the emotional connection between the brand and its audience.

Physical Store Expansion Strategy

Epic Tech plans to begin operations with a main store in Cairo supported by an online store that provides shipping services to customers across Egypt.

After establishing a stable customer base, the company plans to expand gradually by opening additional branches:

- **The first physical store will be located in Cairo as the main operational hub.**
- **The second branch will be opened in Nasr City to serve customers in eastern Cairo.**
- **Future expansion will include opening a branch in Alexandria.**

This expansion strategy helps the business in two important ways:

- **Reducing shipping costs for customers by providing closer store locations.**
- **Allowing customers to pick up their orders directly from the nearest branch instead of relying only on shipping services.**

This approach improves customer convenience while increasing brand trust and accessibility.

Market Positioning

Epic Tech will position itself as a value-focused technology retailer in the Egyptian PC hardware market.

The concept of value for money in Epic Tech's strategy focuses on offering authentic, high-quality computer components backed by warranties from trusted distributors and official suppliers.

Instead of focusing only on offering the cheapest prices, Epic Tech emphasizes:

- **Genuine hardware components from verified distributors**
- **Clear and reliable warranty coverage**
- **Strong after-sales service and technical support**

This positioning ensures customers receive reliable products and professional support while maintaining competitive pricing.

Growth Direction for the Brand

Epic Tech's growth strategy focuses on building a strong digital presence while gradually expanding its physical retail presence.

Key growth directions include:

Social Media Growth

Social media will serve as the primary channel for reaching potential customers. Epic Tech will create engaging video content including:

- **PC build videos**
- **Gaming performance demonstrations**
- **Product reviews**
- **Hardware comparison videos**
- **Educational technology tips**

Platforms such as TikTok, Facebook, and Instagram will play a major role in attracting new audiences and building brand awareness.

Community Building

Epic Tech aims to build a strong community of gamers and PC enthusiasts who interact with the brand through social media platforms.

This community will grow through:

- **Educational content**
- **Interactive discussions**
- **Hardware recommendations**
- **Gaming performance demonstrations**

A strong community increases engagement, builds trust, and encourages word-of-mouth marketing.

Content-Based Trust Building

Customers in the PC hardware market usually perform extensive research before purchasing products.

By publishing educational content explaining hardware choices and performance expectations, Epic Tech can position itself as a trusted advisor rather than simply a retailer.

Data-Driven Decisions

As the business grows, Epic Tech will analyze customer feedback, engagement metrics, and purchasing behavior in order to continuously improve its product offerings, marketing strategies, and customer experience.

Services Offered

Epic Tech aims to provide a range of services that simplify the process of purchasing

and upgrading computers while ensuring long-term customer satisfaction.

Custom Gaming PC Builds

Epic Tech provides custom PC build services where customers can select hardware components based on their performance requirements and budget.
This service allows gamers, designers, and professionals to build systems optimized for their specific needs.
Customers also receive expert consultation to ensure compatibility between components and optimal performance.

Pre-Built Desktop Computers

Epic Tech will also provide pre-built desktop computers designed for different performance levels.
These systems are suitable for customers who prefer ready-to-use computers without selecting individual components.
All systems are assembled and tested to ensure stable performance and reliability.

PC Components

Epic Tech offers a wide variety of individual computer hardware components such as:

- **Graphics Cards (GPU)**
- **Processors (CPU)**
- **RAM**
- **SSD and Storage Devices**
- **Motherboards**
- **Power Supplies and Cooling Systems**
- **Monitors**

Selling individual components is particularly important for new businesses because many customers initially prefer purchasing specific parts or upgrades rather than buying a complete PC system.
This approach allows customers to upgrade their devices gradually according to their needs and budget, while also enabling Epic Tech to attract a wider range of customers who are looking for individual hardware components instead of full computer builds.

Accessories and Gaming Peripherals

The store also provides gaming accessories and peripherals such as:

- **Keyboards**
- **Mice**
- **Headsets**
- **Other gaming accessories**

These products allow customers to enhance both gaming and productivity setups, providing a more complete and efficient computer experience.

Technical Consultation

Many customers are not fully familiar with PC hardware specifications.

Epic Tech offers technical consultation services that help customers choose the most suitable components based on their needs, performance requirements, and budget.

This service helps prevent compatibility issues between hardware components and enables customers to make confident and informed purchasing decisions.

After-Sales Support

After purchasing products, customers may require assistance with installation, troubleshooting, or warranty claims.

Epic Tech provides after-sales support to resolve issues efficiently and ensure that customers receive the necessary assistance after their purchase.

This support plays an important role in maintaining long-term customer trust and satisfaction.

Unique Selling Point (USP)

We provide the best computer and laptop selling services, provide all components at the cheapest prices, and provide after-sales service, as the brand provides service

WhatsApp

To respond to

Customers

Where it is done
