Targeting

We mainly focus on tech users starting with Gamers Freelancers and University Students in addition to Employees who rely on devices for daily work as well as tech communities and influencers who help us reach more users both online and offline.

Primary Gamers / Freelancers

This segment has been selected as the primary target audience for the following reasons:

High Spending Power

This segment is willing to pay higher amounts for strong performance and high quality, as the device is essential for their gaming or professional work.

Repeat Purchases

They frequently upgrade their devices (e.g., GPU, RAM, and storage), ensuring continuous sales over time.

Focus on Value, Not Just Price

They aim to get the best performance within their budget and often seek expert advice before making a purchase decision.

Customer Loyalty

When provided with good overall experience (product + service), they are more likely to become loyal customers and make repeat purchases.

Strong Influence on Others

They have a strong influence within their communities (friends, colleagues, and online groups), which helps attract new customers through recommendations.

Secondary Students /Employees

This segment has been selected as a secondary target audience for the following reasons:

Large Market Size

This segment represents a wide portion of the market, helping to increase overall sales volume.

Easy to Target

They can be easily attracted through offers, discounts, and installment plans.

Consistent Demand

They continuously need devices for studying or daily work purposes.

Simpler Purchase Decisions

They do not rely heavily on complex technical details, making them easier to convince.

High Price Sensitivity

They prefer budget-friendly options, which require delivering clear value for mone
